Professional Summary

Data Analyst with hands-on experience in data wrangling, cleansing, transformation, and validation across large, multi-source datasets using Python (Pandas), SQL, and AI-assisted automation. Skilled at building reliable data pipelines, monitoring data quality, and delivering business-ready datasets and dashboards. Quick learner, eager to apply emerging AI and analytics tools to drive accurate, actionable business insights.

Professional Experience

Hachi AI | AI Engineer – Purchase Order Automation

Oct 2025 – July 2026

- Built and maintained a Python/SQL data pipeline for the RAB Purchase Approval process, cleansing, transforming, and validating 8,000+ purchase order records weekly from multiple source systems.
- Automated data ingestion, integration, and formulaic quantity prediction from Excel sources, improving data quality and reducing manual processing effort by over 80%.
- Integrated Syspro APIs to validate and reconcile supplier/buyer data, ensuring accurate, consistent, business-ready datasets across the procurement workflow.
- Designed Python-based Gmail ingestion and structured parsing pipelines with webhook-driven automation to monitor data quality and stream clean records into downstream reporting systems.

Internships

Infosys | AI & Analytics Intern

Feb 2024 – Jul 2024

- Used SQL and Python to query, clean, and transform sports datasets in SQLite, integrating GPT-3.5 APIs to convert natural language questions into executable SQL for faster reporting.
- Built and maintained a Streamlit dashboard to visualize analytics outputs, enabling stakeholders to interactively track key metrics and business insights.

Projects

AI Virtual Interview Coach

Apr 2025

- Built a data-driven feedback platform using Python, Gemini AI, and Pandas to process and analyze candidate response data and generate real-time, personalized reports.
- Applied NLP techniques to evaluate response quality, structuring unstructured text data into measurable metrics.

Real-Time Object Detection for the Visually Impaired

Nov 2024

- Developed a YOLO-based real-time object detection system, processing live video data streams to identify objects and generate audio guidance.
- Implemented using OpenCV, NumPy, and Python for efficient edge deployment.

Education

Sri Indu College of Engineering and Technology | B.Tech CSE (AIML)

Nov 2021 – Jun 2025

Technical Skills

- **Data Analysis:** Data Wrangling, Data Cleansing & Transformation, Data Validation, Data Quality Monitoring, ETL Concepts
- **Programming & Databases:** Python (Pandas, NumPy), SQL, SQLite, HTML
- **Visualization & Reporting:** Power BI, Streamlit, Excel
- **AI & Automation:** GPT-3.5, Gemini, Claude, NLP, Scikit-learn, Webhooks, Playwright

Certifications

Claude Certified Architect – Foundations (CCA-F) | Data Analysis — DevTown | AI Primer — Infosys
